

AACI Required Survey Documentation for Maternity Clinical Excellence Certification

Please find below the list of clinical guidelines and leaflets that would be useful to provide during an AACI maternity survey.

1. Communication pathways between primary and secondary care
2. Algorithm for reduced fetal movements
3. Diabetes
4. Epilepsy
5. Cardiac Disease
6. Renal Disease
7. 1st stage of labour
8. Pain Relieving strategies
9. Regional anaesthesia
10. Water birth
11. 2nd Stage of labour

- I. Recommended methods of induction of labour;
- II. Monitoring of fetal heart and contractions;
- III. Pain Relief;
- IV. Prevention and management of complications; and
- V. Induction in special circumstances;
- VI. Preterm prelabour rupture of the membranes;
- VII. Prelabour rupture of the membranes;
- VIII. Previous caesarean section;
- IX. Maternal request and
- X. Prevention of prolonged pregnancy.

12. Augmentation of labour
13. Intermittant Auscultation
14. Electronic Fetal Monitoring
15. Fetal Blood Sampling (if applicable)
16. Operative Vaginal Delivery
17. Shoulder Dystocia
18. 3rd and 4th degree tears
19. Post Partum Haemorrhage
20. Surgical Count
21. Obese Women

22. Early Warning Scores
23. Recovery Guidelines
24. Hypertension
25. VTE risk assessment
26. VTE thrombophylaxis
27. treatment of VTE
28. Newborn care
29. Breast feeding
30. Formula feeding
31. Jaundice
32. Management of prelabour rupture of membranes at term;
33. Prevention of perinatal Group B Streptococcal disease;
34. Investigations before and during the use of antibiotics and
35. Regimes for antibiotic prophylaxis and antibiotic treatment.
36. Hypothermia;
37. Hypoglycaemia;
